**Why Suddath**

- Trusted since 1919
- Largest commercial mover in the U.S.
- Broad menu of services for one-time projects or ongoing programs
- Proven tools and techniques to help save you time and avoid mistakes
- Real-time visibility and tracking through our patent-pending technology
- 18 wholly-owned national locations
- National network of trusted agents and partners in 150 countries globally
Expertise in Your Unique Environment

No two moves are the same. An office move requires careful furniture planning and protection of confidential documents, whereas a hospital could involve priceless specimens and multi-million-dollar laboratory equipment. When you choose Suddath, you gain nearly 100 years of specialized experience and expertise in the most challenging relocation environments. With industry specific solutions catering to the unique needs of your business, we help you save time and money, reduce risk and avoid mistakes. Whether you are moving your corporate headquarters across town, are supporting multiple facilities across the country or are bringing brand new medical, industrial or hotel facilities on line, Suddath has the experience needed to keep your business moving forward.

Industry-Leading Technology

Innovative Technology for Greater Control and Visibility

A common pain point for our customers is the lack of modern technology in the moving business. That’s why Suddath strives to be the most innovative company in our industry. After listening to client requirements, we developed award winning technology applications that dramatically improve the customer experience. With Suddath, you get visibility, convenience and peace-of-mind through our web-based client portals, detailed guaranteed estimates, digital contracting, modern inventory control and your own customized digital dashboard to monitor move progress and quality.

Click below to learn more

Our Estimator application helps you make informed decisions with instant paperless, accurate and guaranteed estimates. We provide you with a detailed listing of the goods to be moved along with a full scope of services including dates, times, locations and our labor and equipment commitments. We also make it simple and convenient to place your order with an industry leading electronic acceptance process.

Suddath is the only company in the industry that provides you with a digital dashboard that monitors move progress, inventory control and quality. With our Tracker technology, you will watch your move take place real time, directly through your smart phone, tablet or computer device. Have peace of mind knowing that you have visibility to every step of your move from wherever you are, in any place in the world.

Customers with ongoing facility support needs or multiple locations often struggle to keep service requests organized and as a result overspend due to a lack of centralized control. Our customized service request management system brings convenience, control and savings to your ongoing move and furniture support program. Additionally, Portal integrates with your existing facility management systems.

Suddath is proud to be the 2018 CIO Award Winner for our innovative proprietary technology, Tracker, which digitally tracks inventory and move status.

Our Promise to You

We ask questions, listen and develop a customized relocation plan for how your business works

Every company is different and no two move plans should be the same. There is no “one size fits all” plan.

We help you get ready and make it as easy as possible

Our role is to help you prepare in a well thought out and positive way. We make proven tools, techniques and additional services available to streamline the process as you plan, furnish and relocate your business.

We are honest, upfront, polite and courteous

We will not over promise and if we make a mistake, we will let you know immediately and we will fix it. We also recognize that your people are your greatest asset and we will make sure they are treated the right way.

We educate our teams upfront and only send professionals

We educate our business movers upfront to make sure they understand their responsibilities and your priorities. We train and certify our crews to standards set by the International Office Moving Institute (IOMI®) as well as manufacturer specifications. We always make sure to obtain access and security clearances before move day and all of our crew members will be in uniform and have met our criminal background check standards.

We keep our commitments and make sure you are satisfied

We will do what we say we are going to do; if your move calls for a project manager, five drivers, twenty movers, five trucks, building protection and 300 dollies at 5:00 PM, that is exactly what you will get. We also continuously follow up with you to see if you need anything and make sure you are completely satisfied.

We are responsive and accountable

Your project manager will be your single point of contact and is assigned to stay with the project until the end. We will be available to you 24/7/365 – there is no such thing as an unreturned phone call. Additionally, we use the same crews throughout your project, so you know your team from day one and can count on them through completion.
