Enclosures are fabricated from high-impact resistant material in 3 standard colors:

- White
- Slate grey
- Black

An inset on face of cover allows for every unit’s faceplate to be customized. A number of printed substrates, from dye-sublimated metal, to luxurious veneers and laminates make for myriad possibilities.

CONTACTLESS SANITIZERS

DUGGAL VISUAL SOLUTIONS - 63 Flushing Avenue, Building 25, Brooklyn, NY 11205 - innolab@duggal.com - www.duggal.com

*SANITIZER SOLUTION NOT INCLUDED*
These sleek displays with integrated touchless hand sanitizer dispenser are designed to fit seamlessly into any environment.

Unit is ACM, finished in matte white or black, and includes a weighted, non-porous, avonite stone base and matching accent cap.

More elaborately branded versions with full coverage printing, dimensional lettering, and more are available by quotation.

Inquire for cost of custom features and options.

**SANITIZER TOTEMS**

DUGGAL VISUAL SOLUTIONS - 63 Flushing Avenue, Building 25, Brooklyn, NY 11205 - innolab@duggal.com - www.duggal.com
FEATURES & SPECIFICATIONS

- Durable steel construction in 3 standard finishes, black, champagne, and white.

- Features such as custom colors, printed logos, mask dispensers, acrylic partitions, or dual-sided sanitizing units are available, inquire for moq.

- Brandable with cut-cut vinyl, or magnetic graphics.
- Integrated slot for glove dispenser.

- Includes a decorative cover for the sanitizer unit and matching removable refuse bin.

- Automated sanitizer unit uses high-yield foam, four times more efficient than standard liquid, and runs on batteries.

CUSTOM SANITIZER TOTEMS

DUGGAL VISUAL SOLUTIONS - 63 Flushing Avenue, Building 25, Brooklyn, NY 11205 - innolab@duggal.com - www.duggal.com
These kiosks combine a contactless hand sanitizing station with an infrared thermal sensor, enabling employees and visitors to monitor their temperatures and ensure their hands are clean throughout the day.

- Integrated 8” HD display provides instant temperature readouts and optional facial recognition results, even with a mask on.
- Touchless hand sanitizer has 1200ml fluid capacity with a refillable reservoir.
- Suitable for high-yield foam sanitizer fluid.
- Thermal sensitivity from 86°F to 113°F, with ± 0.5° tolerance.
- Built-in Android OS.

TEMPERATURE AND SANITIZER KIOSKS

DUGGAL VISUAL SOLUTIONS - 63 Flushing Avenue, Building 25, Brooklyn, NY 11205 - innolab@duggal.com - www.duggal.com
These temperature scanners contain an infrared thermal sensor and camera combination, enabling employees and visitors to monitor their temperatures and ensure they are safely beneath a set threshold before entering a location.

- Integrated 8” HD display provides instant temperature readouts and optional facial recognition results, even with a mask on.
- No-touch scanning reduces risks of cross-contamination.
- Thermal sensitivity from 50°F to 108°F, with ± 0.5°F tolerance.
- Can be wall mounted or attached to a table or floor stand (sanitizer dispenser optional)
- Can take multiple readings simultaneously.

TEMPERATURE AND SANITIZER KIOSKS

A digital gatekeeper system uses cameras or "time-of-flight" sensors to determine how many occupants are in a space at any given time. The data collected can then be used in concert with Duggal’s CMS platform to trigger messaging in real-time; informing visitors whether or not it is safe to enter the space.

Gatekeepers can also be configured to send push notifications to designated personnel. Cleaning staff can be alerted to a shared space that needs to be sanitized, or a security officer allocated to a particularly high-traffic area.

- Depending on use case, existing USB or POE camera systems already onsite may be used.
- Alternative sensors that are inherently anonymous, and blend seamlessly into the space can be used for a more refined aesthetic.
- Existing digital signage displays can be repurposed for occupancy messaging.

**DIGITAL GATE KEEPER**

Duggal’s premium multi-layer masks are made from a soft, printable, fabric.

The cotton/polyester combination is breathable, washable, and includes a pouch for an optional activated charcoal filter that provides a more effective barrier than other masks.

The 2.5 in PM2.5 refers to the size of airborne pollutants in micrometers.

Particulate matter 2.5 micrometers or smaller is considered especially harmful because it can intrude into the lungs, or even directly into the bloodstream once inhaled.

These masks are effective without the filters, but have an increased ability to reduce these harmful pollutants when filters are used.

These fabric masks are not medical grade, but are still recommended by the CDC as they "advise the use of simple cloth face coverings to slow the spread of the virus and help people who may have the virus and do not know it from transmitting it to others."

- 6.5” x 5” fully printable area with dye-sublimation.
- blocks up to 90% of contaminants with optional PM2.5 activated charcoal filter.
- elastic ear loops make for a close, comfortable fit.
- available with black or white loops.

**PREMIUM FACE MASKS • MULTI-LAYER, PRINTABLE FACE COVERINGS**
