Nature’s Mold Solution Guaranteed

OCEANIC was developed specifically to improve the management of mold and bacteria biological contamination problems in residential, commercial and industrial properties. OCEANIC solves biofilm problems.

OCEANIC is a specially formulated, state-of-the-art combination of organic ingredients designed to provide a superior treatment alternative to chemicals and/or demolition. OCEANIC safely improves indoor air quality.

Advantages of OCEANIC:
- Environmentally responsible
- Innovative enzymatic formula
- Non-toxic for humans and pets
- Breaks down proteins to eliminate allergenic potential
- Independently tested
- Laboratory and field proven
- Non-corrosive, Non-flammable
- 100% biodegradable
- Natural ingredients made from plants
- No exposure risk to occupants or applicators
- No collateral damage as is possible with harsh chemicals

Directions for Use:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. OCEANIC is formulated specifically to remove mold and bacteria biological contamination from structures. It is designed to be applied by trained, certified technicians. Consult the product label and the SDS for complete details.

Independent certified laboratories evaluate data collected prior to treatment to insure that no unnecessary applications are performed.

Independent certified laboratories evaluate post-treatment data to prove efficacy to customer satisfaction.

OCEANIC eliminates the need for harsh chemicals and oxidizing agents that contain unsafe ingredients.

OCEANIC eliminates the need for expensive demolition and reconstruction projects.

OCEANIC penetrates building materials to reach hidden contamination and remains effective long after application.

Chemicals, especially chlorine bleach, evaporate almost instantly, meaning they can provide only short-term, temporary assistance and offer no residual control of mold or bacteria contamination.

As a catalytic enzyme, OCEANIC does not evaporate immediately after use like the chemical alternatives; OCEANIC enzymes remain effective long after application.
Physical/Chemical Characteristics:
OCEANIC is a water soluble liquid, opaque in color, with a slight citrus fragrance. All components are natural organic and derived from plants. The preservative system is comprised of EPA and/or CFR-listed components at or below federally mandated levels. Specific identities of these ingredients are considered by nzymSys, Inc. to be Trade Secrets and are withheld in accordance with provisions 1910.1200 of Title 29 of the Code of Federal Regulations.

Fire and Explosion Hazard:
Non-flammable, no associated hazards.

Hazardous Ingredients:
None

Reactivity:
OCEANIC is a stable, buffered liquid containing no oxidizing agents. Strong oxidizing agents should be avoided. Although there are no known decomposition hazards and there are no known conditions to avoid, reasonable care and caution are recommended.

Health Hazard Data:
EYE CONTACT: Flush with water for 15 minutes to remove product.
SKIN CONTACT: In case of prolonged contact, wash thoroughly with soap and water.
INGESTION: If ingested, rinse mouth with water; drink up to 8 ounces of water; if stomach discomfort occurs, seek medical advice.

Storage and Cleanup:
OCEANIC should be stored in a clean, dry place, between 40 degrees and 115 degrees Fahrenheit. Spills should be wiped up with cloth or paper towels and the area rinsed with water. Keep out of reach of children.

GMP and TQM Quality Program:
OCEANIC is manufactured to strict specifications using industry accepted GMP procedures. Every batch is tested as part of a rigorous TQM program by an independent laboratory prior to shipping.

Application Instructions and Applicant Preparation:
OCEANIC IS TO BE APPLIED ONLY BY TRAINED, CERTIFIED TECHNICIANS. Product is not sold or distributed for retail use. The work area should be well ventilated. Although the product is non-hazardous, the concentrated fog could cause discomfort due to volume; therefore, when applying OCEANIC, a full face mask with eye protection and a N95 or P100 particulate filter should be worn. Coveralls and gloves are recommended.
